DETAILED ACTION

1. Claims 1-18 are pending in the application.

Allowable Subject Matter

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:
 - a. The prior art does not teach or fairly suggest cost-adaptive cache with dynamic partitioning that stores data based on replacement cost including a corresponding phantom cache. Furthermore, the combination of the phantom cache with a cost adaptive dynamic partition is not suggested by the prior art indicated below, especially since such combination allows for the caches dynamically adjust sizes based on the cost of replacing contained data.
 - b. Independent **Claims 1 & 16** are distinguished over the closest Prior Art of Saulsbury et al. (US Patent # 5,900,011), which discloses a partitioned cache **[Figure 1, #104 & Column 2, Lines 29-33]** and victim cache **[Figure 1, #106 & Column 2, Lines 34-39]**, Lamberts (US Patent # 6,418,510), which discloses a replacement cost functional calculations **[Column 4, Lines 11-18]** and Smith (US Patent # 5,394,531), which discloses dynamic cache sizing based on an LRU strategy **[Column 2, Lines 62-68]**. Although Saulsbury, Lamberts and Smith, in combination, do disclose some features of the Applicant's invention, they do not disclose using data replacement cost to dynamically adjust the size of real and partitioned caches.
